

## PRODUCT SPECIFICATIONS

### SEAFARER 200™

Seafarer 200™ is a high performance Boat Hooding fabric that is specifically designed to protect against the harsh Australian marine environment. The fabric is produced in the optimum width of 200cm and offers excellent features including a waterproofed and UV resistant PVC coating with “easy clean” surface.

Seafarer 200™ is produced on a superior high tenacity, fine textured polyester backing cloth that provides excellent strength and stability, as well as extremely attractive appearance. The backing cloth is initially prepared using high quality dyes and processed with a specially formulated treatment for anti mildew protection to ensure the highest quality protective standards are achieved.

GAUGE: (AS1441.3)	0.75mm (+or - 0.1mm)
WEIGHT: (AS1441.2)	710g/m2 Nominal
CONSTRUCTION:	Spun Polyester Broken Twill
TEAR STRENGTH: (AS2001.2.10)	Warp: 120N minimum Weft: 110N minimum
TENSILE STRENGTH: (AS2001.2.3)	Warp: 2800N minimum Weft: 1550N minimum
COATING ADHESION: (AS1441.5)	70N/50mm minimum
FLEX CRACKING (AS1441.6)	400.000CYCLES
WIDTH:	200cm
